

Importing AAU Membership Data into AES

AAU and AES have created the ability to import AAU membership data into AES. The import function will verify AAU membership as well as reduce the amount of data entry required by clubs. Only members that have been imported through this process will have validated AAU membership numbers in AES. This function is available to import both athletes and staff (non-athletes) that have valid AAU club codes associated with their AAU membership.

INSTRUCTIONS

1. **Log into your AES account at www.advancedeventsystems.com.** If you do not have an account, you will need to create a Club Director account.
2. **At the top of the page click on "AAU Data Import."**

Update

7. Please note, AAU does not verify date of birth. The date of birth inputted when joining AAU will be imported. It is the responsibility of the club to ensure all participants have the correct information. Proof of age may be required for some events.
8. If you are missing players or staff that have a current AAU membership, their membership is likely not attached to your AAU club membership in the AAU system. Club codes can be added or edited in your AAU membership account if you purchased the membership. Go to www.aauvolleyball.org and click "Member Login" to edit a membership. For assistance, contact AAU at volleyball@ausports.org or call 407-934-7200.
9. To add additional athletes/staff to your AES account, you may import your AAU information again after the new members have joined AAU.
